- What exactly is ***Innovation***, anyway?
 - New idea, device, or method....
 - Application of better solutions that meet new requirements, unarticulated needs, or existing market needs.
 - More effective products, processes, services, technologies, or business methods
 - Related to, but not the same as, *invention*
 - Result of a process that brings together various novel ideas in a way that they affect society.

Ecclesiastes 1:9 New International Version (NIV)

⁹ What has been will be again,
what has been done will be done again;
there is nothing new under the sun.

Yes, you can...

- We can all be innovators!
- PDSA
- Fellowships – Foundational, Advanced, and specific to PFE
- Cross-Cutting Strategies
- Innovation Grants (formerly known as Seed Grants)

Kentucky Hospital [Improvement Innovation](#) Network

Education hasn't really changed *that much...*

- Innovation is in the **implementation**

AND-

- Are we really doing what we say we are doing?
- Are we really doing what we think we are doing?
