

AIM

Primary Drivers

Secondary Drivers

Reduce mean CAUTI rate by ___% over ___ years

Adaptive changes

Avoid urinary catheterization when possible

Standardized Insertion Process

Senior leader as part of improvement team

Engage front line workers in project early and often

Adopt and imbed policy regarding medical indications for urinary catheterization

Audit compliance with policy/review outliers

Provide compliance feedback/ tie to individual performance

Adopt and embed policy regarding EBP insertion technique

Audit technique policy compliance

Provide compliance rate feedback/ tie to individual performance

AIM

Primary Driver

Secondary Driver

Reduce mean CAUTI rate by --- over --- years

Standardized maintenance policy

Adopt and imbed policy based on evidence based bundle*

Audit compliance with bundle/review outliers

Provide compliance feedback, tie to individual performance

Equipment/Supply Availability

Develop process for convenient access to supplies for best practice, e.g., insertion kits, "add-a foley" kits

If not at or near a rate of 0, consider other interventions, e.g., CHG bathing, hydrogel, silver or antimicrobial coated catheters

Promote Culture of Safety around devices

Learn and adopt team and communication skills

Adopt policies which combine individual accountability with a blame-free, patient centered approach to error

Assure policies/processes are in place to reduce risk to individuals confronting colleagues/reporting breaches, errors, e.g., overtly stated senior level support for staff "stopping the line" when breaches in policy occur.
